

“We will be forever grateful to Indian River Medical Center for saving Norm’s life.”

“A complete blockage like the one Norm had in his left anterior descending artery often doesn’t show up until an autopsy. That’s why doctors call it the ‘widow maker.’ We are so grateful we didn’t have to experience the effect of those menacing words.

One way we express our gratitude is through our annual support of the Foundation. We’re amazed at what the Foundation has accomplished at IRMC (see list on back). Those accomplishments — and the hospital’s lifesaving services are the reasons we make IRMC our top giving priority.”
